Notice regarding the FAIS RE Level 1 3-Day Preparatory Workshop

Due to unexpectedly high demand for these workshops, INSETA has had to undergo a process to secure funds for additional workshops. As we manage public funds, our processes for funding and appointing providers are very strict and subject to supply-chain management rules.

It must be noted that additional workshops are for:

- Candidates that have previously written the exam and failed (not new entrants)
- Priorities will be aligned to exemption expiry dates
- Candidates that have registered for the exams already will be accommodated first.

Dates for the next round of workshops will depend on the procurement of suitable training providers and regrettably INSETA cannot promise that workshops will run in time for all candidates, prior to expiry of their exemptions.

Nevertheless, INSETA has already provided updated learning material, aligned to legislation updates. This is available cost-free to all candidates for self-study and these can be accessed from the Inseta website.

To obtain the study material and the study preparation guide line, please go to the INSETA website (www.inseta.org.za) under FAIS & Regulatory Exams, then click to RE Learning Material, then click INSETA learning material and fill in the required details to access the learning material.
